AXIS P33 Network Camera Series – Indoor models

Fixed domes for any environment with remote focus and zoom.

AXIS P33 Network Cameras constitute a series of indoor and outdoor-ready fixed domes. These cameras are ideal for unobtrusive video surveillance, day and night, in exposed areas such as airports, subways, retail stores, bank buildings, schools and university campuses. This document covers the indoor models of AXIS P33 Series.

AXIS P33 Series offers models with exceptional image quality from SVGA resolution up to 5 megapixel, including SMPTE standard compliant HDTV 720p and 1080p video. AXIS P33 Series provides multiple, individually configurable H.264 and Motion JPEG video streams.

The SVGA and HDTV 720p models support Axis' Lightfinder technology, which make these cameras extremely sensitive to low light. AXIS P3384-V that additionally supports wide dynamic range (WDR) with 'dynamic capture', provides outstanding video quality in the most demanding conditions with strong variations in light. The 5 megapixel model, AXIS P3367-V, can cover a large area with exceptional detail and light sensitivity. All AXIS P33 models support P-Iris control for optimal image clarity.

The remote focus capability allows for convenient installation, eliminating hands-on focusing at the camera. The remote zoom and pixel counter features ensure that the camera's angle of view is optimized for the area to be monitored and the required pixel resolution.

AXIS P33 Series provides multiple, individually configurable H.264 and Motion JPEG video streams. All AXIS P33 cameras offer digital pan/tilt/zoom and the 3-megapixel and 5-megapixel models additionally provide multi-view streaming.

AXIS P33 Series has low, environmental-friendly power consumption, supplied by standard Power over Ethernet (IEEE 802.3af).

Fixed domes designed for efficient installation

Indoor models of AXIS P33 Series are the perfect choice for a wide range of demanding video applications. AXIS P33 Network Cameras are designed for professional video surveillance with easy and reliable installation in focus.

Lightfinder technology

The SVGA and HDTV 720p models of AXIS P33 Series incorporate Axis' unique Lightfinder technology. The outstanding light sensitivity, with maintained colors even in very poor lighting conditions, is obtained by a combination of Axis' expertise in image processing, system-on-chip development and selection of the best optical components.

For more on Lightfinder technology, go to:
www.axis.com/corporate/corp/tech_papers.htm

Wide dynamic range - dynamic capture

AXIS P3384-V that supports WDR with 'dynamic capture' is ideal for surveillance in areas with strong variations in light, for instance close to large windows and entrances, where the sunlight creates both very bright zones and dark shadows. AXIS P3384-V enables easy and clear identification of people and objects both in bright and dark areas.

P-Iris control

AXIS P33 Series features the advanced precise iris control that comprises a special P-Iris lens, together with dedicated software in the camera, to set the best iris position for optimal depth of field, resolution, image contrast and clarity. Good depth of field implies that objects at different distances from the camera are in focus simultaneously.

Easy installation with remote focus and zoom

AXIS P33 Network Cameras offer unique installation capabilities including remote focus and zoom. The remote focus feature enables convenient focusing over the network, eliminating the need for hands-on fine-tuning at the camera. The remote zoom functionality ensures that the camera's angle of view is optimized for the area to be monitored.

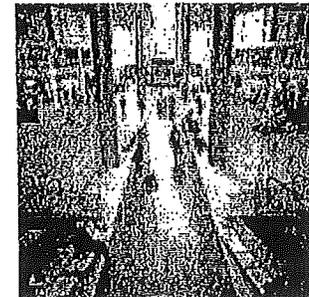

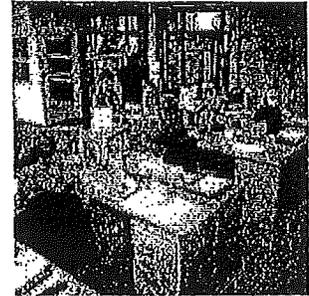

Unique pixel counter feature

The unique pixel counter offered in Axis cameras allows the installer to easily verify that the camera installation fulfills any regulatory or specific customer requirements on pixel resolution, ensuring, for instance, that there are enough pixels in the human face for facial identification.

Mounting options

AXIS P33 Series offers a wide range of optional kits for indoor installations, for example, for mounting on a wall, pole or corner. The IP51-rated drop ceiling mount kit protects the camera from condensation and dust that may exist in the plenum space above the drop ceiling. They include a smoked transparent cover as an alternative to the clear cover, for additional flexibility.

SECTION 2 – REQUIREMENTS

ALL OFFERS ARE SUBJECT TO THE REQUIREMENTS, PROVISIONS AND PROCEDURES CONTAINED IN THIS CERTIFICATION FORM. Offerors are expected to READ, SIGN and COMPLY WITH all requirements. Failure to do so may be grounds for disqualification of the offer contained herein.

Section 2.1 - RULES FOR SUBMITTING OFFERS

2.1A. This CERTIFICATION FORM MUST BE ATTACHED IN ITS ENTIRETY TO THE FRONT OF THE OFFER and shall be considered an integral part of each offer made by a vendor to enter into a contract with the State of Rhode Island, Division of Purchases. As such, submittal of the entire Bidder Certification Cover Form, signed by a duly authorized representative of the offeror attesting that he/she (1) has read and agrees to comply with the requirements set forth herein and (2) to the accuracy of the information provided and the offer extended, is a mandatory part of any contract award.

To assure that offers are considered on time, each offer must be submitted with the specific Bid/RFP/LOI number (provided above) and the date and time of opening marked in the upper left hand corner of envelope. Each bid/offer must be submitted in separate sealed envelopes.

A complete, signed (in ink) offer package must be delivered to the Division of Purchases (via any mail or messenger service) by the time and date specified for the opening of responses in a sealed envelope.

Bids must be submitted on the RI bid solicitation forms provided, indicating brand and part numbers of items offered, as appropriate. Bidders must submit detailed cuts and specs on items offered as equivalent to brands requested WITH THE OFFER. Bidders must be able to submit samples if requested. Mail To: Division of Purchases, One Capitol Hill, Second Floor, Providence, RI 02908-5855.

2.1B. RIVIP SOLICITATIONS. To assure maximum access opportunities for users, public bid/RFP solicitations shall be posted on the RIVIP for a minimum of seven days and no amendments shall be made within the last five days before the date an offer is due. Except when access to the Web Site has been severely curtailed and it is determined by the State Purchasing Agent that special circumstances preclude extending a solicitation due date, requests to mail or fax hard copies of solicitations will not be honored. When the result of an Internet solicitation is unsuccessful, the State of Rhode Island will cancel the original solicitation and resolicit the original offer directly from vendors.

2.2. PRICING. Offers are irrevocable for sixty (60) days from the opening date (or such other extended period set forth in the solicitation) and may not be withdrawn, except with the express permission of the State Purchasing Agent. All pricing will be considered to be firm and fixed unless otherwise indicated. The State of Rhode Island is exempt from Federal excise taxes and State Sales and Use Taxes. Such taxes shall not be included in the bid price. PRICES QUOTED ARE FOB DESTINATION.

Bidders must comply with the provisions of the Rhode Island labor laws, including R. I. Gen. Laws §§ 37-13-1 *et seq.* and occupational safety laws, including R. I. Gen. Laws §§ 28-20-1 *et seq.* These laws mandate for public works construction projects the payment of prevailing wage rates, the implementation and maintenance of occupational safety standards, and for projects with a minimum value of \$1 Million, the employment of apprentices. The successful Bidder must submit certifications of compliance with these laws from each of its subcontractors prior to their commencement of any work. Prevailing wage rates, apprenticeship requirements, and other workforce and safety regulations are accessible at www.dlt.ri.gov.

Offerors are encouraged to attend public bid/RFP openings to obtain information; however, bid/RFP response summaries may be reviewed after award(s) have been made by using the RIVIP at any time or appearing in person at the Division of Purchases Mondays through Fridays between 8:30 a.m. and 3:30 p.m. Telephone requests for results will not be honored. Written requests for results will only be honored if the information is not available on the RIVIP.

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Purpose of Form

A person who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN to the person requesting it (the requester) and, when applicable, to:

- Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),
- Certify that you are not subject to backup withholding, or
- Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income.

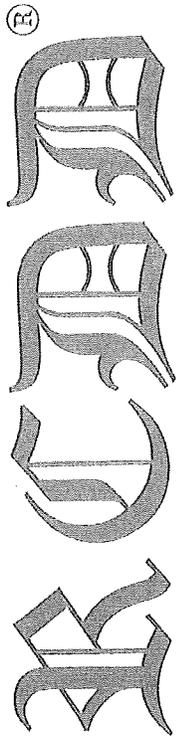

Note. If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Definition of a U.S. person. For federal tax purposes, you are considered a U.S. person if you are:

- An individual who is a U.S. citizen or U.S. resident alien,
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States,
- An estate (other than a foreign estate), or
- A domestic trust (as defined in Regulations section 301.7701-7).

Special rules for partnerships. Partnerships that conduct a trade or business in the United States are generally required to pay a withholding tax on any foreign partners' share of income from such business. Further, in certain cases where a Form W-9 has not been received, a partnership is required to presume that a partner is a foreign person, and pay the withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United States, provide Form W-9 to the partnership to establish your U.S. status and avoid withholding on your share of partnership income.

Omnicast Benefits

Security that Evolves with You

Deep Integrations with the Hardware of Your Choice

Omnicast's open architecture gives you the freedom to completely customize your system. This means that you can choose from the latest IP cameras or re-use existing analog hardware, using IP encoders, to cut down initial deployment costs. With support for a wide range products from leading technology partners, Omnicast provides integrations with your preferred video hardware and software applications.

Video You Can Rely On

Count on access to live and recorded video available whenever your team needs it. Built-in failover and redundancy features warrant high system availability for video at all times, ensuring you can depend on Omnicast in your mission-critical safety and surveillance operations.

Unify Your Security System

As part of Genetec's Security Center platform, gain greater efficiency and time spent managing disparate applications by unifying your security and business systems. Omnicast can be unified with access control events and alarms, providing a consolidated view of security operations within an intuitive client interface that synchronizes all video and access control monitoring and reporting.

Manage More Video Over Your Network

As the adoption of higher resolution, megapixel camera increases, so too does the need for intelligent video management software to reduce bandwidth consumption. Omnicast provides industry-leading functionality that enables you to minimize bandwidth costs in order to grow your system of HD cameras without hesitation.

Key Product Features Greater Possibilities

Reduce Bandwidth Consumption

Dynamic Stream Selection: Rely on Omnicast to automatically switch the resolution of your video streams, based on the size of the video file, in order to reduce the load on your network and workstation

Multicasting: Allow many users in various locations to view a video feed simultaneously, without overcrowding the network, by using the bandwidth of each network segment only once.

Multistreaming: Configure different video settings for different video usage, such as live viewing, remote live viewing, recording, etc., to lower the bandwidth that is used and provide the ability to extend storage length of your recordings

Network Load Optimization: With the flexibility to modify advanced settings, such as capping bandwidth, you can optimize the network load thanks to Omnicast's deep-level integration with Tech Partners' edge devices.

Video Trickleing: In cases where bandwidth is limited, you can transfer video stored on edge devices to an Archiver, only when you need it. The capacity of recording video directly at the camera level presents many benefits, including the ability to lower bandwidth consumption and scheduling trickleing for when network demand it low.

Benefit from Greater Reliability

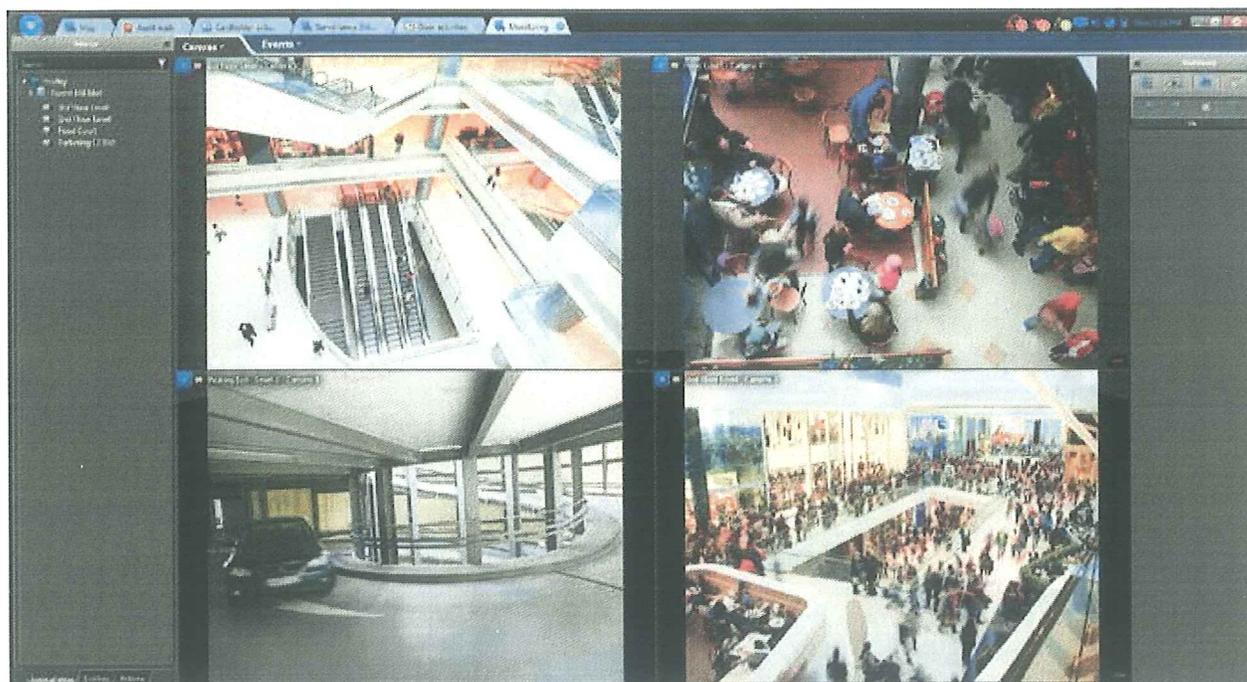

Backward Compatibility: Easily phase in upgrades in order to reduce downtime and cost of system maintenance with software that is backward compatible.

Failover and Redundancy: Ensure that video recording and communication with cameras are secure. Built-in failover and redundancy mechanisms will protect the video recording against hardware and software failures as well as storage failures and network interruptions.

Health Monitoring: Actively monitor the health and up-time of your security system and be notified of your system's performance in real-time through Omnicast's native health monitoring engine.

Uninterrupted Video Streaming: Even if your Directory becomes unavailable, Omnicast can preserve access to live video streaming so that you can continue to monitor cameras without interruption.

Video Watermarking: Add a digital signature to each recorded video frame to ensure its authenticity and that video evidence can be admissible in court.

Advanced Security Features

Interactive Mapping system: Plan Manager is a dynamic map-based command and control module of Security Center that provides interactive functionality to better visualize your security environment

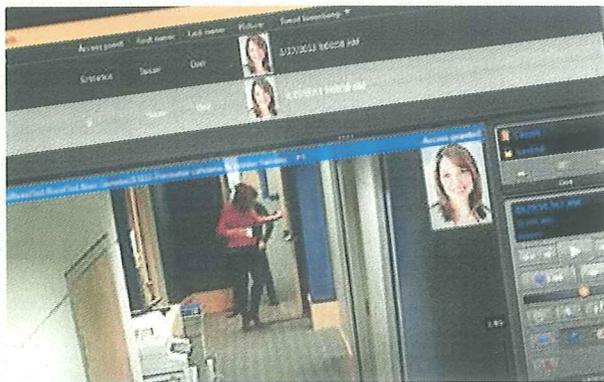

Remote Security Desk: Easily configure a state-of-the-art video wall using standard flat panel displays, allowing you to monitor entities, control live and playback video, and change tile layouts.

Unified Access Control & Video: Unify access control events and alarms with your Omnicast video system. Consolidate security alerts within an intuitive client interface, and take advantage of a synchronized view of video and access control monitoring and reporting.

Threat Level Management: Instantly change the configurations of your security system, including camera setting and door access rights, in response to changing security conditions and potential threats based on predefined settings.

Video Analytics: Select from a number of video analytic tools developed by technology partners that have integrated key functionality from their solutions with Security Center, in order to manage events and alerts detected in Omnicast.

Web and Mobile Apps: Security Center Mobile and Web Client provide operators rapid access to monitoring and reporting capabilities anywhere they go

Camera Blocking: Security and IT departments can prevent the viewing of sensitive data by blocking access to live and recorded cameras based on permission levels.

Federation: Centralize Omnicast system monitoring under a single virtual system for ease of global live video monitoring and playback, alarm management, and reporting across all time zones.

Password Protected Export: Safely export video files with a custom encryption key and ensure that only authorized recipients are able to view the file.
