CIVIL & UTILITY | PROJECT EXPERIENCE

Massport Logan Airport, Terminal C Departures Bridge Repair

The Terminal C departures area is a covered, upper deck drop off area populated by vehicles, pedestrians and luggage carts. BOND crews performed the work to remove and replace the concrete wearing surfaces, and waterproofing membranes. In addition, the project also involved replacing of over 1,400LF of expansion joints and 4,000-square foot of concrete structural repairs.

Massport expanded the scope several times as areas of failure more extensive than expected were discovered; one of which included complete replacement of the beam seats on the cap of Bent 4/5 of the elevated roadway.

Throughout the scope modification process BOND collaborated with the consulting engineer and Massport to assure that we would be able to perform the work with minimal impact on vehicular and pedestrian traffic. The plan required willing cooperation between all stakeholders, off-hours shifts, strategic placement of traffic barriers, signs, and lighting, and the airport roadway experience of BOND's field staff. This bridge rehabilitation project was successfully delivered while simultaneously maintaining safe, partially active roadways, above and below the work area.

Massport, Logan Airport, Terminal A Redevelopment

BOND worked “airside” to complete the underground infrastructure of the new Delta Airlines Terminal at Logan Airport. The new service lines, including storm drainage, electrical duct banks, high mast lighting, and an underground jet-fuel hydrant system were installed by our own forces.

The fuel system included 5,000-foot of new piping and a state-of-the-art emergency fuel shut-off system. Much of this work involved working with live fuel lines.

BOND placed 865,000-square foot of concrete apron paving and 720,000-square feet of bituminous concrete taxiway paving, up to 18-inches thick, according to a detailed logistics plan and required close coordination with airport officials. All work adhered to strict FAA specifications.

Our field management team was also responsible for the coordinating the continuously evolving logistics plan for moving and relocating more than 65-construction trailers throughout the project.
